

# FW200Z – Low-cut, Lace-up Safety Shoes (S1P)

## Colours Available:

**Overview:** The FW200Z safety footwear is designed to offer exceptional protection and comfort in a variety of work environments. Meeting the S1P standard, these shoes are suitable for areas where there are risks of falling objects and penetration hazards, ensuring the safety of your feet.

### Key Features:

**Upper:** Made from microfiber, the upper is durable and provides a professional look while being resistant to wear and tear.

**Collar:** The collar is made from high-quality PU, offering additional support and comfort around the ankle.

**Lining:** The interior features black BK mesh lining, enhancing breathability and moisture management to keep your feet cool and dry.

**In Sock:** The in-sock is constructed from Hi Poly combined with BK mesh, adding comfort and cushioning for prolonged wear.

**Insert Plate:** Equipped with an iron insert plate, these shoes ensure protection against sharp objects while maintaining structural integrity.

**Toecap:** The iron toecap is designed to withstand impacts of up to 100 joules, providing reliable protection in hazardous environments.

**Sole:** The rubber sole offers excellent slip resistance and durability, suitable for a variety of workplace conditions.

**Standard:** The FW200Z meets the S1P standard, ensuring antistatic properties, energy absorption, and penetration resistance.

**Conclusion:** The FW200Z safety footwear is ideal for professionals seeking a combination of safety, comfort, and style at indoor, such as warehousing and logistics industrial. These shoes will keep your feet protected and comfortable throughout your workday.
