

FW301 – Mid-cut, Lace-up Safety Shoes (S1P)

Colours Available:

Overview: The FW301 safety shoes are designed to provide superior protection and comfort in various work environments. With a focus on safety, these shoes meet the S1P standard, ensuring that they are suitable for use in areas where risks of falling objects and penetration hazards are present.

Key Features:

Upper: Crafted from embossed leather, the upper offers durability and a professional appearance while providing resistance to wear and tear.

Collar: The collar is made from high-quality PU, providing additional support and comfort around the ankle.

Lining: The interior features BK Mesh lining, which enhances breathability and moisture management, keeping your feet cool and dry throughout the day.

In Sock: The in-sock is constructed from high-density poly material combined with BK Mesh for added comfort and cushioning.

Insert Plate: Equipped with an anti-static Kevlar insert plate, these shoes ensure electrical safety and protection against sharp objects while maintaining flexibility.

Toecap: The composite toecap is designed to withstand impacts of up to 200 joules, offering reliable protection without the weight of traditional steel caps.

Sole: The dual-density PU/PU sole provides excellent grip and cushioning, ensuring comfort during prolonged wear while being resistant to various workplace hazards.

Conclusion: The FW301 safety shoes are ideal for professionals seeking a blend of safety, comfort, and style. Whether you're on a construction site or in an industrial setting, these shoes will keep your feet protected and comfortable throughout your workday.
