

# FW500E – Ankle cut, Slip-In Sneakers Safety Shoes (S1P)

## Sneakers Series

Colours Available:

The FW500E is a high-performance safety shoe designed to provide ultimate comfort and protection in demanding work environments.

**Upper:** Made from knitting mesh nylon, the upper is both breathable and flexible, ensuring a snug fit that adapts to the foot's shape for all-day wear.

**Lining:** The interior features a black BK mesh lining that enhances moisture management, keeping feet dry and comfortable even during long shifts.

**In Sock:** Incorporating a combination of high-density poly and BK mesh, the in-sock design offers excellent cushioning and ventilation, reducing fatigue throughout the day.

**Insert Plate:** A Kevlar insert plate adds an extra layer of protection against punctures, making the FW500E ideal for hazardous work conditions.

**Toecap:** Equipped with a steel toecap rated to withstand impacts of up to 200 joules, this shoe ensures robust protection against heavy objects.

**Sole:** The EVA sole is lightweight yet durable, providing superior shock absorption to enhance comfort during extended use.

**Standard:** Complying with S1P safety standards, the FW500E is a reliable choice for professionals in construction, manufacturing, and other industrial sectors, combining safety and comfort in a stylish package.
