

# FW500S – Low-cut, Lace-up Safety Shoes (S1P)

## Sneakers Series

Colours Available:

**Overview:** The FW500S safety shoes are engineered for those who need a perfect blend of safety, comfort, and visibility in their work footwear. Meeting the S1P standard, these shoes are ideal for various demanding environments, ensuring your feet are well-protected while enhancing your presence in low-light conditions.

### Key Features:

**Upper:** Constructed from high-quality suede leather, the upper is not only durable but also features a reflective strip for increased visibility in dimly lit areas, enhancing safety on the job.

**Collar:** The PU collar adds extra comfort and support around the ankle, making these shoes suitable for long hours of wear.

**Lining:** The BK Mesh lining ensures superior breathability, helping to keep your feet cool and dry during extended use.

**In Sock:** The in-sock combines high-density poly material with BK Mesh, providing excellent cushioning and support for everyday comfort.

**Insert Plate:** Featuring a Kevlar, insert plate, these shoes offer added protection against sharp objects while maintaining flexibility for ease of movement.

**Toecap:** The steel toecap is designed to withstand impacts of up to 200 joules, providing robust protection against falling objects and compression risks.

**Sole:** The rubber sole is engineered for superior grip and slip resistance, ensuring stability on various surfaces, while also being comfortable for all-day wear.

**Conclusion:** The FW500S safety shoes are an exceptional choice for professionals who require reliable protection, comfort, and visibility in their footwear. Whether in warehouses, or any other challenging work environment, these shoes deliver the performance and safety you need to stay focused on the job.
