

FW500T – Low-cut, Sneakers Safety Shoes (S1P)

Sneakers Series

Colours Available:

The FW500T is a premium safety shoe engineered to provide exceptional comfort and reliable protection for professionals in demanding work environments.

Upper: The shoe features a knitting mesh nylon upper that promotes breathability and flexibility, allowing for a comfortable fit that conforms to the foot's shape during prolonged use.

Lining: Lined with black BK mesh, the interior enhances moisture-wicking properties, ensuring your feet stay dry and comfortable throughout the day.

In Sock: The in-sock design combines high-density poly with BK mesh for superior cushioning and ventilation, effectively reducing fatigue during long hours on your feet.

Insert Plate: A Kevlar insert plate adds an extra layer of puncture resistance, protecting against sharp objects often encountered in industrial and construction settings.

Toecap: The FW500T is equipped with a steel toecap capable of withstanding impacts of up to 200 joules, offering robust protection for your toes.

Sole: The durable rubber sole provides excellent grip and stability, enhancing safety on slippery surfaces while ensuring longevity.

Standard: Complying with S1P safety standards, the FW500T is the ideal choice for workers seeking a perfect balance of safety, comfort, and performance in their footwear.
