

## FW601 – Mid-cut, Steel Ring Lace-up Safety Shoes (S1P)

### Colours Available:

**Overview:** The FW601 safety footwear is engineered to deliver superior protection and unparalleled comfort in various work environments. Meeting the S1P standard, these shoes are designed to protect against risks such as falling objects and penetration hazards, ensuring safety on the job.

#### Key Features:

**Upper:** Crafted from embossed leather, the upper provides durability and a professional look while resisting wear and tear.

**Collar:** The collar is made from high-quality PU, offering additional support and comfort around the ankle.

**Lining:** The interior features a grey BK mesh lining, enhancing breathability and moisture management to keep your feet cool and dry.

**In Sock:** The in-sock is constructed from Hi Poly combined with BK Mesh, adding comfort and cushioning for prolonged wear.

**Insert Plate:** Equipped with a steel insert plate, these shoes ensure protection against sharp objects while maintaining structural integrity.

**Toecap:** The steel toecap is designed to withstand impacts of up to 200 joules, providing reliable protection in hazardous environments.

**Sole:** The nitrile sole offers excellent slip resistance and durability, suitable for a variety of workplace conditions.

**Standard:** The FW601 meets the S1P standard, ensuring antistatic properties, energy absorption, and penetration resistance.

**Conclusion:** The FW601 safety footwear is ideal for professionals seeking a combination of safety, comfort, and style. Whether you're on a construction site or in an industrial setting, these shoes will keep your feet protected and comfortable throughout your workday.
