

FW800 – High-cut, Slip-In Safety Shoes (S1P)

Colours Available:

The FW800 is a high-cut, slip-in safety shoe designed for professionals seeking maximum protection and convenience in dynamic work environments.

Upper: Crafted from embossed leather, the upper provides durability and a stylish finish, ensuring the shoe withstands daily wear and tear while maintaining a professional appearance.

Lining: The interior is lined with black BK mesh, which enhances breathability and moisture-wicking capabilities, keeping feet dry and comfortable throughout long shifts.

In Sock: Featuring a combination of high-density poly and BK mesh, the in-sock delivers exceptional cushioning and ventilation, helping to reduce fatigue during extended periods of use.

Insert Plate: The FW800 includes a robust steel insert plate, providing crucial puncture resistance against sharp objects often encountered in industrial settings.

Toecap: This model is equipped with a steel toecap that can withstand impacts of up to 200 joules, ensuring comprehensive toe protection from heavy falling objects.

Sole: The sole is made from durable PU/PU, offering excellent shock absorption and grip, making it suitable for various surfaces and conditions.

Standard: Compliant with S1P safety standards, the FW800 is the ideal choice for those who prioritize safety, comfort, and ease of use in their footwear, making it perfect for construction, manufacturing, and other demanding industries.
